

Adam AZ-Extra Retail Scale with Fish Scoop

AZextra Price Computing Scales

- Accurate technology that you can trust to give you the maximum reliability
- Tough Construction - The ABS plastic housing can withstand even your toughest environment
- User-friendly Features - Every AZextra comes packed with features you need at a price that you want

Adam Equipment's AZextra is an approved retail scale that is fast accurate and versatile. Using proven processing technology combined with software that delivers the features needed in today's retail environments the AZextra is the best choice for your price computing applications.

The series incorporates an internal rechargeable battery, that lasts up to 90 hours before it requires to be recharged, allowing the scale to be used anywhere without the need for an external power source. Auto sleep / power down function helps save battery life. The 103 product memories help speed the process and reduce possible operator errors. A choice of pricing by 100g³ or by the kg increases flexibility for marketing your products. The RS-232 interface outputs the time, date, price to pay, weight and price per unit – this information can be sent to a printer or a computer. A stainless steel platform, colour coded keys, and a large backlit display complete the package to make the AZextra a valuable part of your operation.

AE ADAM
THE RIGHT BALANCE
Speed, Performance, Value

The AZextra Price Computing Scales with Features for your Retail Applications

Low profile design with 4 adjustable non-slip feet and level bubble, provide great support, saves counter space and helps improve the readings.

Large backlit LCD displays with 20mm digits show weight, unit price, and price to pay clearly. Additional customer display either on the back of the scale or mounted on a pillar¹.

Unit price for price per 100g³ or price per kilogram. Selectable auto clear function enables the last item to be reset when scale returns to zero each time. Reducing the number of key strokes for the users.

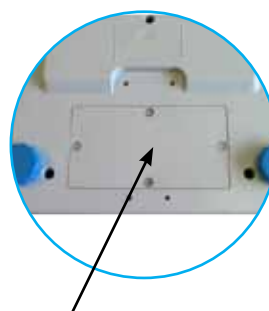

Bi-directional RS-232 interface with multi-language text on print out. Real time clock with date and time aids record keeping to increase productivity.

Features
