

Salter WS300-50 Platform Scales

WS300-50 Light capacity platform scales provide a low cost solution for general purpose weighing of any item up to 300kg capacity.

With 1 part in 6000 resolution these platform scales give a weighing performance of 300 kg x 50 g.

These well designed low profile machines incorporate four full load bridge loadcells with self levelling, anti-slip feet to give a solid base in use.

The generous size weigh platforms is 550mm x 550mm and is supplied with a green rubber mat. The WS300 platform has a tough, mild steel understructure and a stainless steel top.

5 metres of cable connects the base to the stainless steel indicator pod which features clear 17mm high LCD display digits. A plastic display pod bracket is included to enable the indicator to be wall or bench mounted as required.

Key display features are: on/off, push button tare to enable container weights to be removed and net weight only displayed; kg/lb switching to give readings in either metric or imperial measures and hold/print, which allows the weight to be either frozen even when the item being weighed is removed or the weight to be transmitted to a printer or other peripheral device.

The scales feature auto zero tracking to automatically compensate for small fluctuations in zero such as a build up of material on the platform.

To extend battery life an auto-off feature is standard, with the scale switching itself off after 2 minutes of inactivity.
